Response to Remarks

Applicants' arguments, filed on 3/5/07, have been approved and entered. They have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-10 are rejected under 35 U.S.C. 102(a) as being anticipated by Kim et al. (PUB NO.: US2002/0006626).

Kim et al. discloses a process for preparing monolayers and microarrays of biomolecules by reacting functionalized dendrimers on solid surface with biomolecules such as proteins antigens antibodies enzymes ligands receptors and the like. The process comprises the steps of : reacting a metal surface or a glass surface (which is viewed as the fine particle based on the definition in the instant specification pages 2-3 bridging paragraph) with alkane thiol or derivatized silane with amine reactive functionality to obtain a self-assembled monolayer; reacting the self-assembled monolayer with amine-terminated dendrimers to give micropattern of dendrimers; and reacting the patterned dendrimers with biomolecule of protein, antigen, antibody, enzyme, receptor, or ligand which is viewed to be inclusive of the extraction step. (see Figures and pages 1-2).

Art Unit: 1637

This rejection is being reapplied because the reference do discloses particles as defined in the instant specification Pages 2-3. Therefore the term fine particles is broad enough to include Kim's particles and therefore the argument that the bonding is weak and unstable are just allegations without factual supports.

Claims 11-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
